The Tale of Teais the saga of globalisation. Tea gave birth to paper money, the Opium Wars and Hong Kong, triggered the Anglo-Dutch wars and the American war of independence, shaped the economies and military history of Táng and Sòng China and moulded Chinese art and culture. Whilst black tea dominates the global market today, such tea is a recent invention. No tea plantations existed in the world's largest black tea producing countries, India, Kenya and Sri Lanka, when the Dutch and the English went to war about tea in the 17th century. This book replaces popular myths about tea with recondite knowledge on the hidden origins and detailed history of today's globalised beverage in its many modern guises.

Recent research has demonstrated that, in the Roman, Late Antique, Early Islamic and Medieval worlds, glass was traded over long distances, from the Eastern Mediterranean, mainly Egypt and Israel, to Northern Africa, the Western Mediterranean and Northern Europe. Things that Travelled, a collaboration between the UCL Early Glass Technology Research Network, the Association for the History of Glass and the British Museum, aims to build on this knowledge. Covering all aspects

of glass production, technology, distribution and trade in Roman, Byzantine and Early Medieval/Early Islamic times, including studies from Britain, Egypt, Cyprus, Italy and many others, the volume combines the strengths of the sciences and cultural studies to offer a new approach to research on ancient glass. By bringing together such a varied mix of contributors, specialising in a range of geographical areas and chronological time frames, this volume also offers a valuable contribution to broader discussions on glass within political, economic, cultural and historical arenas.

First published in 1950 and this edition in 1987, this book is one of the most wide-ranging and respected surveys on kinship and marriage in African social life. In his introduction, Radcliff-Brown provides a masterly analysis of the main features of African kinship systems and the theoretical problems arising from the study of them. The contributions range from examinations of kinship systems among the Swazi, the Tswana, the Zulu, the Nuer, and the Ashanti, to double descent among the Yakö and dual descent in the Nuba groups of the Sudan. The contributors themselves are still viewed as giants in their field: Evans-Pritchard, Meyer Fortes, Max Gluckman, Hilda Kuper, Naderl, A. I. Richards, Schapera and Monica Wilson.
