Instructor's Manual for Calculus

Early Transcendentals. Howard Anton, Irl C. Bivens, Stephen L. Davis. From the Preface:

"Teaching calculus presents many challenges. Decisions must be made about how much time to spend on each topic, what points need special emphasis, what problems to assign for homework, etc.

Countless people have relied on

Anton to learn the difficult concepts of calculus. The new ninth edition continues the tradition of providing an accessible introduction to the field. It improves on the carefully worked and special problems to increase comprehension. New applied exercises demonstrate the usefulness of mathematics. More summary tables and step-by-step summaries are included to offer additional support when learning the concepts. And Quick Check exercises have been revised to more precisely focus on the most important ideas. This book will help anyone who needs to learn calculus and build a strong mathematical foundation.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Organized to support an "early transcendentals" approach to the single variable course, this version of Rogawski's highly anticipated text presents calculus with solid mathematical precision but with an everyday sensibility that puts the main concepts in clear terms. It is rigorous without being inaccessible and clear without being too informal--it has the perfect balance for instructors and their students.

Download File PDF Early Transcendentals

This new text presents calculus with solid mathematical precision but with an everyday sensibility that puts the main concepts in clear terms. It is rigorous without being inaccessible and clear without being too informal--it has the perfect balance for instructors and their students. Also available in a late transcendentals version (0-7167-6911-5).
