Wind Power Development  
World Bank Studies

One of Asia's best-respected writers on business and economy, Hong Kong-based author Mark L. Clifford provides a behind-the-scenes look at what companies in China, India, Japan, Korea, the Philippines, Indonesia, Hong Kong,

Access PDF Greening The Wind Environmental And Social Considerations For Singapore, and Thailand are doing to build businesses that will lessen the environmental impact of Asia's extraordinary economic growth. Dirty air, foul water, and hellishly overcrowded cities are threatening to choke the region's impressive prosperity. Recognizing a business opportunity in solving social

Access PDF Greening The Wind Environmental And Social Considerations For Wind Power Development World Bank Studies

problems, Asian businesses have developed innovative responses to the region's environmental crises. From solar and wind power technologies to green buildings, electric cars, water services, and sustainable tropical forestry, Asian corporations are upending old business models in their home countries and

# Access PDF Greening The Wind Environmental And

throughout the world. Companies have the money, the technology, and the people to act—yet, as Clifford emphasizes, support from the government (in the form of more effective, market-friendly policies) and the engagement of civil society are crucial for a region-wide shift to greener business practices. Clifford paints detailed profiles

environmental aid.

As the United States grapples with the  
issue of global climate change resulting

Access PDF Greening The Wind Environmental And Social Considerations For Wind Power Development World Bank Studies

from fossil fuel combustion, and as the U.S. Congress and individual state legislatures consider restructuring the electric utility industry, lawmakers should keep in mind the environmental preferability of renewable energy sources such as wind and the long, continuing record of public support for them. This is

Access PDF Greening The Wind Environmental And Social Considerations For particularly important in view of restructuring, which will have the effect of shifting decisions about the type and quantity of new power plants to be built from utility executives to the general public. Preliminary information suggests that "green, " or environmentally-friendly, power sources could win a significant

# Acces PDF Greening The Wind Environmental And

market share. In addition to creating new demand for clean energy sources, this development is likely to create a committed, educated political constituency for clean energy that has not existed in the past. In such an altered environment for the selection of new generation, public attitudes on the desirability of various

power sources will become much more important than they have in the past. The purpose of this paper is to briefly summarize public opinion surveys on the environment in general, renewable energy in general, and wind energy in particular in that order, using data gathered from polling in the U.S., the United Kingdom,

Access PDF Greening The  
Wind Environmental And  
and Canada. At this writing, more than 16  
years after the first wind plants began  
going up in California, there is a solid and  
growing body of information available on  
public acceptance of wind energy. This  
paper draws on more than 25 surveys  
conducted over the years on wind and  
renewables, as well as individual findings

# Access PDF Greening The Wind Environmental And

on attitudes on the environment from other  
polls. An abbreviated summary of the  
public attitudes reviewed in this document  
is as follows: Views on the Environment:

Public concern about protecting the  
environment, and particularly those  
aspects of the environment that relate to  
human health, such as air pollution, is high

Access PDF Greening The  
Wind Environmental And  
and growing. Views on Renewable For  
Energy: The public strongly prefers using  
a combination of efficiency and  
renewables to meet energy needs, and has  
done so in poll after poll taken since the  
late 1970s. Views on Wind, General: The  
bulk of public opinion on wind is from the  
U.K., where wind development in recent

# Access PDF Greening The Wind Environmental And Social Considerations For Wind Power Development World Bank Studies

years has been active and controversial. In more than a dozen surveys taken over the past five years, respondents have expressed strong backing for wind. In addition, support for wind has typically strengthened after a wind plant has been installed and operating for some time.

Views on Wind, Specific: Public polling

Access PDF Greening The Wind Environmental And Social Considerations For Wind Power Development World Bank Studies

information on wind energy's specific attributes is also primarily from the U.K. Surveys found that wind's primary positive points are that it is clean, renewable, safe, and helps conserve fossil fuels; its principal weaknesses are the fact that it is intermittent and somewhat more expensive than fossil-fired power. With respect to

Access PDF Greening The Wind Environmental And Social Considerations For Wind Power Development World Bank Studies

wind's environmental impacts, those surveyed were most concerned by visual impact and noise. However, in virtually every poll, the number of respondents expressing negative views is very small.

This book explains the development paths taken by the wind power sector in

Access PDF Greening The Wind Environmental And Social Considerations For Denmark, Germany, Spain, France and the United Kingdom. It explores how wind power has been promoted, and critically reviews public policies to support it. It analyses the economic and environmental implications of its integration into the electricity supply industry, whilst considering issues of planning and social
