Excerpt from Portfolio De Luxe The Cramp shipyards which are known the world over, make their largest profit, not from building battleships, but from manufacturing manganese bronze. Manganese is also used in the manufacture of pottery and glass, in the manufacture of electrical batteries, varnishes, and in a vast number of chemical preparations. It is one of the absolutely essential metals, for there is no substitute. Our manganese deposits alone are of sufficient value to pay dividends of many hundreds of thousands of dollars. People read the Bible for a number of reasons: to enhance their spiritual growth and religious practice, to improve their understanding of the history of the Bible lands, and for the sheer enjoyment of the dramatic stories conveyed by inspirational and poetic language. A Bible atlas serves to locate the events described in a geographic framework, making it an essential supplement to biblical studies. Biblica: The Bible Atlas goes beyond traditional Bible atlases to place the biblical narrative and peoples into their historical, cultural, social and geographic contexts. It provides readers with a better understanding of biblical events and journeys, of the complex history and cultures of the bible lands, and of the modern political landscape of the region. The latest archaeological findings and theological research are presented alongside engaging discussion of the Bible stories, ensuring that readers take away from Biblica new insights and a deeper appreciation of the Bible Breathtaking in its size and scope, Biblica is a visually stunning guide to the Bible and the Bible lands. It includes over 650 full-colour paintings, drawings, etching, sculptures, and scenic photographs, plus 125 original and up-to-date maps of the Bible lands, which bring to life the people, places, and events of the Bible. It is a fitting tribute to the splendour and majesty of the Bible, and it will be a treasured addition to family and libraries the world over.

The aim of the book is to present probability in the most natural way: through a number of attractive and instructive examples and exercises that motivate the definitions, theorems, and methodology of the theory.
