This comprehensive guide can help you administer Red Hat Enterprise Linux 5 effectively in any production environment, no matter how complex or challenging. Long-time Red Hat insider Tammy Fox brings together today's best practices for the entire system lifecycle, from planning and deployment through maintenance and troubleshooting. Fox shows how to maximize your efficiency and effectiveness by automating day-to-day maintenance through scripting, deploying security updates via Red Hat Network, implementing central identity management services, and providing shared data with NFS and Samba. Red Hat Enterprise Linux 5 Administration Unleashed contains extensive coverage of network and web services, from the Apache HTTP server and Sendmail email services to remote login with OpenSSH. Fox also describes Red Hat's most valuable tools for monitoring and optimization and presents thorough coverage of security—including a

Michelle Manning-Kogler's Quantum Soul Clearing Process is your short-cut to ultimate freedom! ~Ronda Wada, Founder, The Business in Your Soul

Yours can be the first APPLE house on the block! Learn how to save time and money by using your Apple II computer to control your home: the security, lights, temperature, telephone, and much more. With John Blankenship's system of software and hardware, your house can accept verbal commands and respond with its own voice. It does not need human instruction and performs many useful tasks on its own. Once you get used to an intelligent house, you will wonder how you ever got along without one. Even though devices featured in The Apple House can be purchased, the author shows how you can save money by building some from scratch. He also points out that you can substitute equipment you already own because of the system's modularity. Although written with an Apple II computer in mind, the principles discussed can easily be transferred to other computer systems.
