Nothing beats the companionable crackle of an open fire. Fires invite us to sit and share stories or watch in contemplative silence. We feel drawn to the flickering flames, the gentle curls of aromatic smoke and reassuring radiant heat. Snuggled under a blanket, toasting crumpets and listening to the pleasing pops of burning wood – what better way to spend a winter's evening? Or, come the summer, few pleasures are richer than cooking food, perched around a campfire, waiting for the stars to come out. But for all this talk, how many of us know how to build a fire? Would we know which kinds of trees burn best? Could we make our own firelighters or build the perfect fire stack? The Little Book of Building Fires is a richly illustrated pocket guide to sourcing, seasoning and storing firewood, choosing kindling and tinder, and how to build and light the perfect fire. From campfires to woodburners, bonfires to open hearths, this book blends practicality with personal experience and will get you back in touch with your ancient firemaking instincts.

This book presents the papers from the latest conference in this successful series on fuel injection systems for internal combustion engines. It is vital for the automotive industry to continue to meet the demands of the modern environmental agenda. In order to excel, manufacturers must research and develop fuel systems that guarantee the best engine performance, ensuring minimal emissions and maximum profit. The papers from this unique conference focus on the latest technology for state-of-the-art system design, characterisation, measurement, and modelling, addressing all technological aspects of diesel and gasoline fuel injection systems. Topics range from fundamental fuel spray theory, component design, to effects on engine performance, fuel economy and emissions. From regular maintenance for optimum performance to emergency repairs, this illustrated e-guide is the perfect handbook for beginners and experienced cyclists alike. The Bike Repair Manual includes insightful information on the anatomy and functioning of all types of bikes - road, racing, mountain, hybrid, BMX and children's. Step-by-step sequences show you how to carry out repairs, from vital servicing to improving your bike's performance both on and off road. Learn how to maintain the main elements, such as brakes, drivetrain, and steering, as well as the complex components, including hub gears, hydraulic brakes, and suspension forks. Detailed chapters cover everything from the correct, safe way to set up your bike and the must-have kit for successful repairs to troubleshooters for keeping your bike in top form. Featuring easy-to-follow photographic tutorials and handy add-ons, such as a step locator and toolbox, Bike Repair Manual is the essential e-guide for every cyclist.

The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia, in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation, originally known as the Ciba Foundation, is well known to scientists and clinicians around the world.

This is the third book from Scottish Author, Lauren Cullen. Once again we travel through a year in time to explore the difficult emotions of complex situations, relationships, politics, philosophy and life. Break the chain is about loving yourself and letting go of things out of your control. The cover is again created by illustrator and artist, Zoe Jackson.
