Welcome to the companion website for Manipulation of the Spine, Thorax and Pelvis, 4e. You now have access to video sequences demonstrating the techniques described in part B of the book (with the exception of the last technique described in chapter 11).

*Elsevier: · Welcome*

Movement of the thoracic spine is coupled with movement of the adjoining ribs. Thoracic extension involves concurrent posterior rotation (external torsion) and depression of the posterior ribs with elevation of the anterior ribs. Bending to the side is a combination of spinal segments side bending, ribs on the same come together while ribs on the opposite side separate.

Spinal manipulation is an intervention performed on spinal articulations, synovial joints, which is asserted to be therapeutic. These articulations in the spine that are amenable to spinal manipulative therapy include the z-joints, the atlanto-occipital, atlanto-axial, lumbosacral, sacroiliac, costotransverse and costovertebral joints. National guidelines come to different conclusions with respect to spinal manipulation with some not recommending it, and others recommending a short course in the
