The Fair Housing Act Design Manual: A Manual to Assist Designers and Builders in Meeting the Accessibility Requirements of The Fair Housing Act provides clear and helpful guidance about ways to design and construct housing which complies with the Fair Housing Act. The manual provides direct information about the accessibility requirements of the Act, which must be incorporated into the design, and construction of multifamily housing covered by the Act. It carries out two statutory responsibilities: (1) to provide clear statement of HUD's interpretation of the accessibility requirements of the Act so that readers may know what actions on their part will provide them with a "safe harbor"; and (2) to provide guidance in the form of recommendations which, although not binding meet the Department's obligation to provide technical assistance on alternative accessibility approaches which will comply with the Act, but may exceed its minimal requirements. The latter information allows housing providers to choose among alternative and also provides persons with disabilities with information on accessible design approaches. The Manual clarifies what are requirements under the Act and what are HUD's technical assistance recommendations. The portions describing the requirements are clearly differentiated from the technical assistance recommendations.

Includes dozens of projects, from fixing leaks to installing a new bathtub and shower.Features a simple, understandable format with photos and step-by-step instructions homeowners need to complete plumbing jobs.Covers repairs, improvements, replacements, and new installations of kitchen and bathroom fixtures.Lists the time, skills, materials, and tools needed to complete a project.Provides the best do-it-yourself resource for homeowners with little or no plumbing experience.Offers special tips on safety, tool use, and buying new fixtures.
