When Button visits a farm, he wants Farmer Chris to take him up the hill to a cute little red henhouse for their first stop. A rooster pecks his toe and he rolls down the hill, crushing watermelons along the way. Unhurt, he finds a big surprise at the bottom of the hill near Sam's Sheep Farm. What is the surprise? Share the love of reading with your beginner reader!

A ferocious debut that puts Frank Bill's southern Indiana on the literary map next to Cormac McCarthy's eastern Tennessee and Daniel Woodrell's Missouri Ozarks Crimes in Southern Indiana is the most blistering, vivid, flat-out fearless debut to plow into American literature in recent years. Frank Bill delivers what is both a wake-up call and a gut punch. Welcome to heartland America circa right about now, when the union jobs and family farms that kept the white on the picket fences have given way to meth labs, backwoods gunrunners, and bare-knuckle brawling. Bill's people are pressed to the brink—and beyond. There is Scoot McCutchen, whose beloved wife falls terminally ill, leaving him with nothing to live for—which doesn't quite explain why he brutally murders her and her doctor and flees, or why, after years of running, he decides to turn himself in. In the title story, a man who has devolved from breeding hounds for hunting to training them for dog-fighting crosses paths with a Salvadoran gangbanger tasked with taking over the rural drug trade, but who mostly wants to grow old in peace. As Crimes in Southern Indiana unfolds, we witness the unspeakable, yet are compelled to find sympathy for the depraved. Bill's southern Indiana is haunted with the deep, authentic sense of place that recalls the best of Southern fiction, but the interconnected stories bristle with the urban energy of a Chuck Palahniuk or a latter-day Nelson Algren and rush with the slam-bang plotting of pulp-noir crime writing à la Jim Thompson. Bill's prose is gritty yet literary, shocking, and impossible to put down. A dark evocation of the survivalist spirit of the working class, this is a brilliant debut by an important new voice.

The only wide-open space Rance McKettrick wants to see in his future is his hometown in his rear-view mirror. The down-to-earth ex-rancher is determined to make a fresh start with his two young daughters – and leave his heart-breaking loss and family's successful corporation far behind.

Fascination with quotidian experience in modern art, literature, and philosophy promotes ecstatic forms of reflection on the very structure of the everyday world. Gosetti-Ferencei examines the ways in which modern art and literature enable a study of how we experience quotidian life. She shows that modernism, while exhibiting many strands of development, can be understood by investigating how its attentions to perception and expectation, to the common quality of things, or to childhood play gives way to experiences of ecstasis—the stepping outside of the ordinary familiarity of the world. While phenomenology grounds this study (through Husserl, Heidegger, Merleau-Ponty, and Bachelard), what makes this book more than a treatise on phenomenological aesthetics is the way in which modernity itself is examined in its relation to the quotidian. Through the works of artists and writers such as Benjamin, Cézanne, Frost, Klee, Newman, Pollock, Ponge, Proust, Rilke, Robbe-Grillet, Rothko, Sartre, and Twombly, the world of quotidian life can be seen to harbor a latent ecstasis. The breakdown of the quotidian through and after modernism then becomes an urgent question for understanding art and literature in its capacity to further human experience, and it points to the limits of phenomenological explications of the everyday.

"A quartet of shrewd and unnerving novellas about toxic entanglements" from the National Book Award-winning author (Booklist). Joyce Carol Oates is one of the most prominent writers of her generation, and she is fearless when exploring the most disturbing corners of human nature. In *Evil Eye*, Oates offers four chilling tales about love so powerful that people might die—or kill—for it. In the title story, we meet Mariana, the young fourth wife of a prominent intellectual. When her husband's first wife comes to visit, Mariana learns a terrible secret that threatens her marriage and sanity. In "So Near Any Times Always," shy teenager Lizbeth meets Desmond, a charming older boy who offers the first spark of romance. Yet as their relationship blossoms, Lizbeth realizes that a menacing soul lies beneath Desmond's perfect façade. In "The Execution," spoiled college student Bart Hansen has planned the perfect crime to get back at his condescending parents. What he didn't plan on was the resilience of his mother's love, even in the face of death. And in "The Flatbed," childhood trauma has prevented Cecelia from enjoying physical intimacy with a man. But when she meets the love of her life, Cecelia must confront the demon who stole her innocence long ago. With the razor-sharp prose that has made Joyce Carol Oates a living legend, *Evil Eye* shows love as sporadically magical, mysterious, and murderous. "A dazzling, disturbing, tour de force of Gothic suspense: four odd, compelling, ingeniously narrated tales that gain in power and resonance when read in conjunction with each other." —The Boston Globe  
"Exquisitely suspenseful. . . . The relationships between the damaged, sometimes monstrous individuals who people these pages will keep the reader riveted." —Publishers Weekly, starred review

Sometimes the simplest answer is the best. Many Enterprise Java developers, accustomed to dealing with

Java's spiraling complexity, have fallen into the habit of choosing overly complicated solutions to problems when simpler options are available. Building server applications with "heavyweight" Java-based architectures, such as WebLogic, JBoss, and WebSphere, can be costly and cumbersome. When you've reached the point where you spend more time writing code to support your chosen framework than to solve your actual problems, it's time to think in terms of simplicity. In *Better, Faster, Lighter Java*, authors Bruce Tate and Justin Gehtland argue that the old heavyweight architectures are unwieldy, complicated, and contribute to slow and buggy application code. As an alternative means for building better applications, the authors present two "lightweight" open source architectures: Hibernate--a persistence framework that does its job with a minimal API and gets out of the way, and Spring--a container that's not invasive, heavy or complicated. Hibernate and Spring are designed to be fairly simple to learn and use, and place reasonable demands on system resources. *Better, Faster, Lighter Java* shows you how they can help you create enterprise applications that are easier to maintain, write, and debug, and are ultimately much faster. Written for intermediate to advanced Java developers, *Better, Faster, Lighter Java*, offers fresh ideas--often unorthodox--to help you rethink the way you work, and techniques and principles you'll use to build simpler applications. You'll learn to spend more time on what's important. When you're finished with this book, you'll find that your Java is better, faster, and lighter than ever before.
