Extensive study of ancient earth mysteries covering both sites and phenomena.

In ancient times the man was very dependent on the nature and natural phenomena. The world in the conception of people of that period was divided into three parts—the sky, the earth, and the underworld. This image of the world was depicted as the World Tree which united these three worlds into a single entity. The World Tree was a symbol of the three worlds—its crown represented the sky, its trunk was the symbol of the earth, the roots were the symbol of the underworld. The world of the ancient

Slavs consisted of three parts:

Prav—the world of gods, Yav—the world of people, and Nav—the underworld.

The beliefs of the Slavic tribes, both western and eastern, were connected with worshipping different tribal deities and spirits. The Slavs who were living on the vast territory of Europe in ancient times had some common gods with similar names as the ancestors of the Slavs used to be united. Besides, the Slavs worshipped the powers of nature—they deified the sun, the moon, natural phenomena, theologizing them, and believed that natural phenomena depended on the will of gods. Therefore, to gain gods' good grace people tried to blandish them in different ways. Special sacred rituals were held for this purpose at a particular time of the year, they made sacrifices to gods, asked the gods for

help in prayers and thanked for success. Svarog and Damp Mother Earth were some of the most ancient gods. The book is written in a simple and clear language and is intended for a wide circle of readers interested in mythology, ancient history and culture. The book contains a lot of ethnographic, historic and occulted information as well as stylized pictures of ancient Slavic gods and spirits.

Previously published in hardcover as War: The Definitive Visual History War has been central to the rise and fall of civilizations since the dawn of time. The history of warfare first emerges from legend in Mesopotamia, the cradle of civilization, around 3,000 years before the birth of Christ. The first armies that we know about fought in Sumeria, Ancient Egypt, and Syria.

From these first battles, fought with spears or axes on horseback or on foot, The Illustrated Encyclopedia of Warfare traces the campaigns and conflicts that have shaped world history and examines the evolution of military tactics and technology. The story of the development from these primitive battles to the global conflicts of the 20th century and the modern "War on Terror" is the story of humanity itself, reflecting the same political, cultural and technological forces that have defined human history. From longbows to laser-guided missiles; from chariots to jet aircraft; and from Samurai warriors to SAS soldiers, The Illustrated Encyclopedia of Warfare provides the definitive visual chronicle of this intense, brutal, and often heroic tale. War combines a coherent and compelling spread-by-
