Examine the anatomy of a horse from an entirely different perspective. This intriguing and original explanation of the 11 internal body systems of horses shows them painted on the outside to describe everything on the inside. The horse is a highly sophisticated living organism so to enable him to reach his full athletic performance and give him a happy, healthy quality of life it is vital to understand both his capabilities and limitations within the context of his structure and function. Gillian Higgins turns her trademark technique of painting internal diagrams directly onto live horses to show how all the systems work, and work together, to influence performance and reduce the risk of injury. Divided into 12 chapters, *Horse Anatomy for Performance* combines high quality photographs and intricate paintings with top tips and fascinating facts to provide a practical and useful guide to horse anatomy. Visually appealing, original and easily understandable, the book explains how anatomy influences the way we manage, ride and train our horses. This book is a sequel to *How Your Horse Moves* by Gillian Higgins; together the books provide a comprehensive guide to horse anatomy in action "Finally a book where you can learn how your horse ticks - inside out - and it is easy to understand and fun to read. A must for every serious equestrian." --Dr W. Bechtolsheimer

The anthrax attacks in September and October 2001 highlighted the need to develop medical countermeasures. The Project BioShield Act of 2004 authorized the Department of Health and Human Services (HHS) to procure countermeasures for a Strategic National Stockpile. However, in December 2006, HHS terminated the contract for a recombinant protective antigen (rPA) anthrax vaccine because VaxGen failed to meet a critical contractual milestone. Also, supplies of the licensed BioThrax anthrax vaccine already in the stockpile will start expiring in 2008. GAO was asked to identify (1) factors contributing to the failure of the rPA vaccine contract and (2) issues associated with using the BioThrax in the stockpile. GAO interviewed agency and industry officials, reviewed documents, and consulted with biodefense experts.
